

# Table of Contents

## 1 Introduction

1.1	Importance of corrosion prevention and control	1
1.2	Improved equipment reliability by means of equipment condition monitoring	3

## 2 Electrochemistry

2.1	Introduction	5
2.2	Thermodynamics	5
2.3	Electrode kinetics	10
2.4	Application of electrochemical corrosion theory on corrosion reactions	13

## 3 Forms of Corrosion

3.1	Introduction	19
3.2	Electrochemical	21
3.2.1	Uniform corrosion	21
3.2.2	Galvanic corrosion	23
3.2.3	Pitting	26
3.2.4	Crevice corrosion	30
3.2.5	Intergranular corrosion	32
3.2.6	Selective corrosion/selective leaching	38
3.3	Electrochemical/Mechanical	40
3.3.1	Stress corrosion cracking (SCC)	40
3.3.2	Corrosion-fatigue	47
3.3.3	Erosion-corrosion	56
3.4	Physical/metallurgical (mechanical)	65
3.4.1	Hydrogen damage	65
3.4.2	Liquid Metal Embrittlement (LME)	77
3.5	High temperature/chemical	80
3.5.1	Oxidation and Sulphidation	80
3.5.2	CO attack	83
3.5.3	Metal dusting	83
3.5.4	H <sub>2</sub> attack (Nelson)	90
3.5.5	Nitriding	93
3.5.6	Creep	96
3.5.7	Carburisation	102
3.6	Atmospheric corrosion	104
3.6.1	Introduction	104
3.6.2	Forms of atmospheric corrosion	105
3.6.3	Preventive measures	114
3.6.4	Cases of atmospheric corrosion	123
3.7	Soil corrosion	127
3.8	Microbiologically induced corrosion (MIC)	130

## 4 Corrosion Prevention and Protection

4.1	Introduction	139
4.2	Design and layout	140
4.3	Materials selection	146
4.3.1	Introduction	146
4.3.2	Carbon steel and cast iron	147
4.3.3	Stainless steels (ferritic, martensitic and austenitic)	153

4.3.4	Duplex stainless steels	159
4.3.5	Nickel and nickel alloys	167
4.3.6	Copper and copper alloys	171
4.3.7	Aluminium and aluminium alloys	174
4.3.8	Titanium, Zirconium and Tantalum	177
4.3.9	Plastics	179
4.4	Protective layers	184
4.5	Changing corrosive environment	190
4.6	Changing electrode potential (Cathodic and Anodic protection)	194
4.7	Chemical industrial cleaning	199
<b>5</b>	<b>Corrosion Examination, Inspection and Monitoring</b>	
5.1	Corrosion examination	207
5.2	Quality Control of materials of construction	214
5.3	Inspection	215
5.4	On-line corrosion monitoring techniques	217
