

# ACNIS International

Premium metals + Premium services

Since 1991, ACNIS International has been a leading stockholder and distributor of semi-finished products in all forms and sizes for industrial, medical and aerospace applications. We serve our customers from our head office based in Lyon, France, but also from our 3 Service Centers located in Paris (AEROMETALS & ALLOYS), Brazil (ACNIS do Brasil) and China (ACNIS Asia).

With an intensive stock of around 500 tons, we supply Titanium (in all grades, alloyed and non-alloyed), Cobalt Chrome (as per ASTM F1537 and ISO5832-12), 316LVM (as per ASTM F138 + ISO5832-1), and other stainless steel grades for implants and instruments. We offer bars, sheets, tubes, flat, hexagonal and square bars, tubes, welding wires and fasteners.

With the recent acquisition of AEROMETALS & ALLOYS, located in Paris, the ACNIS Group has reinforced its expertise of serving aerospace customers as the two companies will be working together to meet the most demanding requirements of customers by harmonizing their skills.

AEROMETALS & ALLOYS not only brings its expertise and accreditations with some of the major players in the aeronautic sector, but also with its cutting machines (rotary cutting, laser cutting, plate cutting and pre-machining saws) which enables us to provide a global solution supplying titanium in varying forms to businesses in France and around the world.

These cutting machines aim to reduce the rate of falls and optimize different formats so that manufacturers can receive goods according to their specifications and machining techniques.

Thanks to our triple certification (ISO 9001, ISO 13485 and EN 9120) and

our close relationships with world-renowned manufacturers, ACNIS International supplies high quality materials.

ACNIS International relies on its team of some 30 multilingual specialists to export its products in over 40 countries around the world, guide and assist its customers in their provision of supplies through its different Service Centers. Our large stock enables short lead time and we export in small quantities (minimum invoice of only 350 Euros), as well as in larger quantities.
