

Castle Metals Ltd

Castle Metals operates from 3 locations in Europe, supporting the global aerospace, Oil & Gas and commercial industries. With full service special metals stocking and processing facilities supporting customers from spot purchasing, to multi-year, highly complex, just-in-time requirements based contracts.

From our state of the art facilities we offer billet preparation, bar, extrusion and plate cutting, PVC coating, CNC, laser, water-jet and plasma processing.

Supported by our US parent company, Castle Metals facilities are strategically placed throughout North America, Europe and Asia, making us the perfect partner for global speciality metals supply chain solutions.
