

Langley Alloys Ltd

Langley Alloys has a rich history of materials research, development, manufacturing and supply of high strength corrosion resistant alloys. The business, originally established at Langley, Slough some 80 years ago, is now located in Newcastle under Lyme, UK. The company specialises in the supply of high strength corrosion resistant alloys to the oil and gas, power generation, petrochemical, chemical processing, paper pulp and general engineering sectors.

Customers who come to Langley Alloys enjoy metallurgical and technical support from a team of experienced metallurgists. All materials are of European origin and comply with international standards e.g. ASTM, NACE and NORSOK. Langley Alloys operates a quality management system based on AS9100 and ISO 9001 throughout its business units worldwide.

Langley Alloys prides itself on its rapid response, quality and excellent service levels across its stock range of high strength copper alloys, nickel alloys, austenitic, duplex and super duplex stainless steels. Typically bar is

available in a range of sizes from ½" up to 14" diameter and plate from 1/16" to 3" thick. Langley also provides sheet, pipe, fittings, flanges, forgings and machined parts as required.

Langley Alloys' interest in stainless steels stems from the 1960's and it was arguably the first company to develop a super duplex grade which it supplies under the tradename, Ferralium®. The current version Ferralium® 255SD50 is manufactured to exacting standards and is well known for its enhanced strength and corrosion resistance when compared with other super duplex grades. Its chemical composition also renders it less susceptible to the formation of deleterious phases which helps maintain impact properties at sub-zero temperatures.

In order to be close to its customers Langley Alloys has developed a number of centres in key locations. Langley Alloys Inc. has locations in Houston, Texas and Portland, Oregon and Langley Alloys SEA has just relocated to bigger premises in Singapore. All sites have cutting facilities and are geared to respond quickly to customer needs.

Langley Alloys

Company details:

Name: Langley Alloys Ltd
Address: 504-506 Lowfield Drive
Newcastle under Lyme
Staffordshire
Postcode: ST5 0UU
Country: United Kingdom
Phone: 0044 1782 610250
Email: sales@langleyalloys.com
Website: www.langleyalloys.com

Name: Langley Alloys (S E Asia) Pte Ltd
Address: 9B Jalan Ampas
Postcode: 329517
Country: Singapore
Phone: 0065 6254 1129
Email: seasia@langleyalloys.com

Name: Langley Alloys – Portland
Address: 12323 NE 99th St, Suite 123
Vancouver, WA
Postcode: 98682
Country: United States of America
Phone: 001 800 878 3675 /
001 360 883 0569
Email: usa@langleyalloys.com

Name: Langley Alloys – Houston
Address: 300 Hilbig St, Conroe, TX
Postcode: 77301
Country: United States of America
Phone: 001 281 819 5588
Email: houston@langleyalloys.com
