

Magnetic Analysis Corporation

MAC Headquarters and Manufacturing Plant in NY.

FACTS:

- **MAC is the only company that can offer NDT multi-test systems comprising eddy current, ultrasonic and flux leakage technologies**
- **MAC is the only company that offers sales, lease and service options**
- **MAC has Representatives and Subsidiaries in 20+ countries**

Östersund, Sweden, Manufacturing Plant.

Boardman, Ohio, Manufacturing Plant.

Magnetic Analysis Corporation was established in 1928 and has evolved into a leader in providing nondestructive test systems to tube, pipe, bar, rod and parts manufacturers utilizing Eddy Current, Flux Leakage, and Ultrasonic methods during the production process.

As manufacturing processes within the steel industry have changed, and new standards developed, MAC's focus

on the needs of our customers has driven us to work closely with them, as well as with the various standards organizations, to develop better solutions to their testing needs.

Through relationships with subsidiaries, representatives and technology partners, we can also supply Tube End and Spinning Tube inspection systems, as well as Phased Array inspection systems.

MAC can supply you with a quotation for sale or lease for multi-test systems, as well as equipment servicing options.

With the capability of locally supplying routine maintenance as well as repairs, MAC has the ability to provide quality service throughout the world, which has been a significant factor in maintaining customer satisfaction.

MAC's Product Line

Echomac® FD5 Ultrasonic Rotaries & Electronics

Multimac® Eddy Current Electronics

Rotomac® Eddy Current Rotaries

Rotoflux® Flux Leakage Rotaries & Electronics

Varimac® & Production Comparator Parts Sorter
