

P.A. Inc.

Leading the way with solutions to specialty alloy piping requirements

P.A. Inc. is a piping material distributor which can provide your company with the most efficient and effective process for procuring the highest quality nickel, high nickel alloy and specialty stainless steel piping products in our industry.

We maintain the most extensive and comprehensive stock of **Nickel 200, Alloy 400, Alloy 600, Alloy 601, Alloy 625, Alloy 800H/HT, Alloy 825, Alloy 020 and Alloy C-276** piping materials in North America. Additionally we maintain an inventory of the complementary butt weld fittings, (including 180 return bends) flanges, forged fittings and fractional tubing in the aforementioned alloy grades. We also maintain a **full line inventory** of specialty stainless steel piping material in grades **304H and 2205**.

In conjunction to the products we inventory, we have the capability to **provide custom fabricated components** made from nickel, high nickel alloy and specialty stainless steel to your exacting specifications.

P.A. Inc. is committed to working with our customers in developing the straightest and strongest supply chain which will produce the most value-added results. We continually look for ways to eliminate any unnecessary links (duplicate, non-essential costs) in the supply chain between the manufacturer and the end user. All products we distribute are acquired factory new from the most reputable manufacturers in the world. We do not "broker" material nor do we advocate the utilization of surplus goods. All our efforts are supported each and every day through a qualitative specification assurance process which is second to none and certified to **ISO 9001-2008 through Platinum Registration, Inc. which is ANAB accredited**. We recently passed our 3 year follow up audit in flying colors.

We maintain complete material traceability not only to the manufacturer, but to the origin of the raw material as well. Products provided by **P.A. Inc.** are supported by a complete set of original Mill Test Reports with shipment and can be provided with the billing notice if so required. All material composition and property data is retained in our in-house data storage and retrieval system. Our **qualitative specification assurance process** includes in-house positive material identification (PMI)

capabilities that include alloy verification utilizing a nuclear analyzer and chemical content verification utilizing an optical emission spectrometer. Additional specification assurances include liquid dye penetrate testing, ultrasonic wall thickness testing, ferrite content confirmation and scope examination of internal walls for abnormalities.

All our customer service representatives have direct customer communication capabilities via phone, fax, scanner, email, text, or internet. We are continually upgrading our data environment capabilities as changes in technology become available. This will allow us to continue to **meet or exceed our customer requirements in the always changing market**.

Today's business climate is considerably different than in years past. We realize that to maintain market share and out perform our competition, P.A. Inc. must be a company "set apart" from all others in our industry. In order for this to be realized, we must always be the most efficient in all facets of our business. All phases of our business must be continually scrutinized for improvements, which will result in meaningful, effective productivity gains. We at P.A. Inc. firmly believe if we provide the best service, offer quality products at fair competitive prices, build strong relationships with our business partners, and strive for continuous improvement not only in our organization, but within our industry, we will maintain a strong competitive edge in our industry.

We know if given the opportunity, P.A. Inc. can provide you with the **most value added supply chain for nickel, high nickel alloy and specialty stainless steel piping products**.

COMPLIANCE STATEMENT: *All products sold by P.A. Inc. are subject to United States Export Controls and any export must be in compliance with United States law*****

Inventoried Grades of Material

High Nickel Alloys

Nickel 200, 400, 600, 601, 625, 690
Alloy 800H/HT, 825, C-276, Alloy 020

Specialty Stainless Steel

2205, 304H

Pipe

Type: Seamless and Welded
Size Range: ½" thru 12"
Schedule: 10S, 40S, 80S, 160, XXH

Flanges

Type: Weldneck, Slip-on, Blind, SW, Orifice, Lapjoint
Size Range: ½" thru 12"
Pressures: 150#, 300#, 900#

Buttweld Fittings

Type: Seamless and Welded
Size Range: ½" thru 12"
Schedule: 10S, 40S, 80S, 160, XXH

Pressure Fittings

Type: Screwed & SW
Size Range: ½" thru 4"
Pressures: 150#, 3000#, 6000#, 9000#
