

# Paul Meijering Stainless Steel

## For standards & non-standards

Paul Meijering Stainless Steel is a family owned company already active for 26 years as a stockholder. Our supply program consists of pipes and components in stainless steel and special alloys. Goods made to measure and problem solving thinking are central elements at our company. "We are independent, we help everyone, we take direct decisions and are not politically engaged. We say yes or no!" A professional team of experienced sales people is waiting for you, each with its own specialization. We deliver direct from our own stock of 3.000 tons, daily and worldwide. Speed, flexibility and quality are our primary concerns. Orders are shipped within 24 hours, complete and delivered to customer requirements.

## PRODUCTS

Under the name InoxDeals, part of Paul Meijering Stainless Steel, we sell 2nd choice / excess prime. This can also

mean surplus and slow moving stocks, material from canceled projects or project-leftovers, especially stainless steel tubes, sheets, coils, band, bars and components.

These materials, in particular 304(L), 316L and 430, are often available in a wide choice and in an acceptable condition in both standard and nonstandard sizes or with a small side or surface damage or minimum tolerance deviation. These materials are very useful, especially for construction work, etc., but at a much more interesting price level. If desired, we can offer you the following additional service facilities: cutting, decoiling, slitting, grinding, brushing and foiling.
