

# Prudential Stainless & Alloys, LP

Prudential Stainless & Alloys, LP is a wholesale distributor / stockist of stainless steel, nickel alloy and aluminum pipe, tube and bar products in hard-to-locate grades and odd-ball sizes.

Founded in 1948 as a distributor of reconditioned World War II surplus fittings, the company diversified into stainless steel pipe as the war surplus business dried up. Over the ensuing 67 years, the company added stainless tubing, nickel alloy pipe and tube, aluminum pipe and tube and stainless and nickel bar. Along the way, the company found their niche: odd-ball sizes and hard-to-locate grades kept in stock for immediate shipping.

Prudential Stainless & Alloys also maintains a strict policy of only selling material directly to distributors /

stockists, wholesalers and metal service centers – never to end users. The policy allows them to drop ship material directly to their customers' customer, speeding up delivery and saving their customers time and money.

#### STAINLESS STEEL:
