

Sankyo & Co., Ltd

Sankyo & Co., Ltd. is a Japanese trading firm specialized in exporting stainless steel and high grade alloy seamless tubular products. If you are looking for suppliers, we are pleased to serve you with 40 years of worldwide experience in this market. Our core business is the trading division which sources from blast furnace mills and special steel mills from home and abroad. Our achievements are symbolized by our huge market share in every industrial sector. In addition, we have developed a niche in the manufacturing industry through our subsidiaries, Sankyo Stainless Tube (Shenyang) Co., Ltd. in China and Sankyo Special Tube Co., Ltd. in Japan – two redrawing mills manufacturing seamless stainless steel tubes.

Trading Division – Since 1975

The trading division provides internationally competitive, high-quality products from steel pipes for large plants to IT precision parts. We supply pioneering products of high quality from reputed manufacturers using a lean distribution system based on refined expertise and experience. To supply products that satisfy various needs of our customers, we ensure that we correctly and fully understand their needs and respond quickly. We leverage Sankyo's global human and

sales networks to provide know-how in specialized fields and collect highly reliable information. With our quick response and reliable supply system, we have established an impressive track record around the world. We will continue to develop our commercial distribution and aim to become a global company that is trusted worldwide.

Manufacturing Division – Since 1995

Sankyo Stainless Tube (Shenyang) Co., Ltd. is our wholly owned subsidiary established in 1995 to supply seamless stainless steel tubes with the special assistance of Kobe Special Tube Co., Ltd. In 2011, Sankyo Singapore Pte. Ltd. was established as a logistics hub. In 2012, our second tube redrawing mill Sankyo Special Tube Co., Ltd. was established in Takeo City, Saga Prefecture, Japan. It was designed to meet global demands for high quality materials from various sectors such as offshore oil & gas, petrochemical, shipbuilding, power generation, etc. We will offer products of the highest quality, to the tightest tolerance, at competitive price, and with short delivery time to exacting markets. Now we are fully certified with ISO 9001, D.N.V., Lloyd's Register and TUV. Today, we export our products to various countries in Asia, Europe, the Americas,

Oceania and the Middle East with our customer's satisfaction.
