

S&N Stainless Pipeline Products Ltd

S&N Stainless Pipeline Products Ltd is a family owned stockist and distributor of pipe, pipe fittings and pipe flanges, and a full range of pipeline related products. Although established in 2002, the company has, however, over 30 years of experience and expertise in serving the demands of the oil & gas, petrochemical, nuclear processing, aerospace and other power related industries.

Over the past eleven years we have seen the company go from strength to strength, even during recent economically difficult times with continued support from our current clients. This has allowed us to maintain a continued investment in the growth of our company and, most of all, our stockholding range and size. This allows us to offer a wider range of products to our clients and to be more flexible and responsive to meet their requirements in an ever more demanding market place. We specialize in all grades of stainless steel and nickel alloys, however we have concentrated on our stockholding range in UNS31254, UNS32760, UNS32750 and UNS31803. With our vast and comprehensive range of pipes, pipe fittings and pipe flanges. From 0.5in nominal bore through to 24in nominal bore, in seamless and welded form from Schedule 10S through to Schedule XXS, and pipe flanges from 150lb through to 2500lb. To allow us to guarantee a fast and efficient service we keep a large stock of pipe flange forgings which can be machined to all of our clients' specialized, individual needs. All of our materials are supplied by

ISO 9001 and NORSOK M-650 approved manufacturers as an absolute minimum, to guarantee the highest quality that the industry demands from materials. Along with our extensive range of stockholding we have also invested heavily in our in-house processes such as all forms of non-destructive testing, liquid penetrant inspection, magnetic particle inspection and ultrasonic inspection, together with positive material identification and ferritoscope examination. All these processes are carried out onsite by fully industry recognized accredited staff members. We maintain a stringent quality management system to ensure all our clients' requirements are met, if not exceeded. In order to ensure this we are a ISO 9001 – 2008 accredited stockholder in addition to being an Achilles FPAL registered supplier. This enables S&N Stainless Pipe line Products Ltd to offer a full materials management service, from design to procurement (including production), through to logistics for delivery any where in

the world. We believe our continuous growth and success is mostly down to the trust and support of all our clients and our obsession with customer service. Together with dedication to quality and on time deliveries this has enabled us to quickly establish ourselves with a global reputation in the supply of 6% Moly, duplex and super duplex pipes, pipe fittings, pipe flanges and all pipeline related products.

We would like to take this opportunity to thank all our clients for their continued support.

S&N Stainless Pipeline Products – the One-Stop-Shop for all your piping products.
