

# Steamline Industries Limited

Steamline Industries Limited, established in the year 1991, is a leading manufacturer of austenitic, ferritic, martensitic, duplex, super duplex stainless steel seamless & welded pipes/tubes/U-tubes. As an ISO 9001:2008, ISO 14001-2004, OHSAS 18001-2007, PED & NORSOK Certified company, it believes in quality, performance and successful execution. A globally recognized player, supplying its products for critical and demanding applications, the company continues to invest and expand.

The group is headed by CMD Mr. Surendra Sharma who believes in ethics and commitment in business.

Steamline Industries Limited has the most modern manufacturing unit for stainless steel welded and seamless pipes/tubes/U-tubes in Himmatnagar, Gujarat.

The company's products are used in a wide range of industries including power, oil and gas, petrochemicals, pharmaceuticals, desalination and many more. The company has also invested extensively in production and quality control equipment, and will continue to invest in future growth.

Since the inception of the SS pipe and tube manufacturing division in mid-2013, the company has, in a very short time span, acquired a very good reputation in the global market by supplying

its quality products to more than 25 countries, offering complete piping and tubing solutions par excellence to its customers, understanding their customized requirements and performing accordingly.

The company today stands as the leading manufacturer and exporter of welded and seamless pipes to USA and aggressively covers the European market.

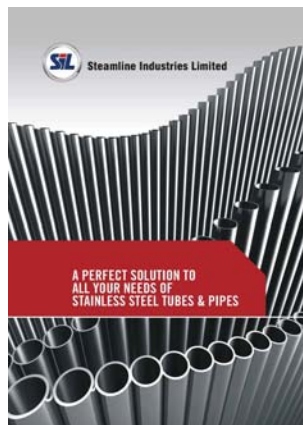

Having a strong base of local customers in the processing industries, Steamline has emerged as a very strong player for the supply of heat exchanger tubes to many projects worldwide. We have been bagging many orders for heat exchanger tubes in austenitic and duplex grades from the domestic and European markets.

Mr. Devendra Sharma, Director, states: "All in all the future looks bright for Steamline Industries Limited. Steamline is definitely the material of the new millennium. Our extensive investment

strategy is ongoing and our future planning includes the upgrading of our large diameter welded pipe facility. With the growing global demand for large diameter welded pipes for the oil and gas sector and cross country pipelines, we are upgrading our existing large pipe facility."

One of the reasons the company is able to innovate and provide the quality and diversity to its customers' demands is its highly qualified and experienced workforce. The top management has more than 25 years of experience in the business. "We have a very sound basis of technical skill and knowledge within the industry", explains E.D. Mr. Tarak Kavi. He concludes that Steamline has many further developments to improve its products and services and will continue to do so to achieve the goal of providing the best service to its customers.
