

SURFACE ENGINEERING S.r.l.

SURFACE ENGINEERING S.r.l. is a manufacturer of industrial machines for mechanical surface finishing of long products with a wide choice of solutions ranging from in line finishing applications, to be installed directly in tubes or bars mills, to stand alone machines which are in use by major producers of stainless steel or service centers.

CREATE YOUR SURFACES

With SE machines different performances can be achieved simultaneously:

- **COSMETIC FINISHES** To achieve with high repeatability and homogeneous quality any commercial surface, brushed, ground, satin up to more finest mirror polished.

- **ACHIEVEMENT OF TARGET ROUGHNESS** all over the products which might require an improved corrosion resistance or in preparation for a successive coating operation.

- **STOCK REMOVAL** A finishing with the right power to remove any chosen amount of material, from a minimum to a thick surface layer with the aim of removing external impurities up to recovering parts from machining marks or deep defects and even recover tolerances.

MACHINE MODELS

The company provides standard machine models and tailor-made solutions, modular systems sized to customers' production volumes and technical requirements.

SE lines are offered complete with ancillary equipment, such as full automatic handling and filtration systems and on demand can be integrated into new or already existing production lines.

Among our standard production can be found:

SERIE ST – focus on round products, our modular polishing and grinding systems are available in different sizes and capacities to match any product dimensions.

SERIE SP – Is dedicated to flat products such as profile tubes and flat bars, including solutions able to work on a

single or two faces simultaneously and up to 4 faces in a single cycle.

SERIE – PL High performances planetary solutions, which have a place in the production of major producers of tubes and bars, capable of matching high working speeds and huge volumes.

SPECIALLY DEVELOPED Machines then complete the widest offer of solutions for long products.

Internal grinder and polisher for pipes, welding track removing system, automatic packing machines for product protection and longitudinal polishers for super mirror polishing.

SE's headquarters and production facility are conveniently located near Milan Malpensa main airport and visitors are always welcome.

Company details:

Name: SURFACE ENGINEERING S.r.l.
Address: Via Quadretto 5/7/11
Magenta (Milan)
Postcode: I-20013
Country: Italy
Phone: 0039 0297003431
Fax: 0039 0297296473
Email: Info@surfaceengineering.it
