

Sverdrup Steel

Sverdrup Steel is a global supplier of high performance materials, providing one of Europe's largest stock holdings in round bars and plates. The company specializes in NORSOK approved material.

Company history

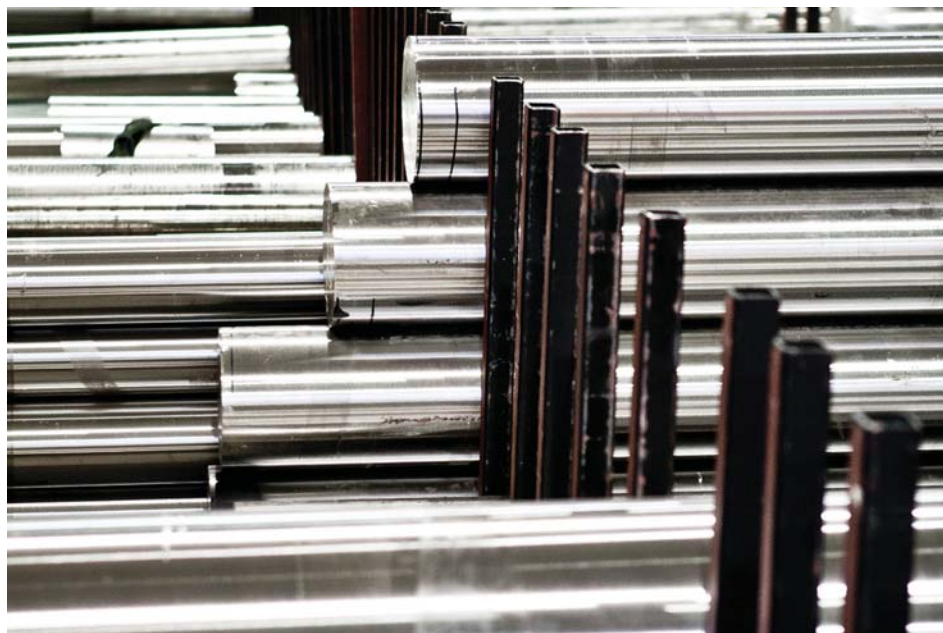

Sverdrup Steel was established in 1992 in Stavanger, Norway. The company was founded to meet the growing demands from the Norwegian oil and gas service industry for high performance materials.

Through more than twenty years of operations the company has built itself up as one of Europe's largest stockholders of high performance materials in round bars and plates. Today the company is present in six different countries (Norway, UK, Denmark, Sweden, Italy, Korea), across twelve different locations.

Products

Established in Norway, home of the NORSOK standard, Sverdrup Steel stocks a complete range of NORSOK approved Material in both round bar and plates. The company has earned a strong reputation for its high service level, with same day deliveries being one example of the services that customers value.

Sverdrup Steel's main export grades for bars and plates are: 2205 / UNS S32205, UNS S31803, UNS S32750, UNS S32760, 254 SMO / 6MO, Alloy 625, Alloy 718, Alloy 925, S165M, 17-4 PH, Titanium gr.2 and gr. 5. The company also stock

low grade alloys, such as AISI 4130, AISI 4140, AISI 4145, AISI 420 and Super 13Crin a wide range of sizes both as solid and bored bars.

Latest developments

A new warehouse opened in Norway in the fall of 2014. The opening marked a milestone in the company history, as it is the first company warehouse dedicated to high alloy plates. From a logistical point of view, the warehouse is perfectly placed to serve customers all across Norway and continental Europe.

Also in the fall of 2014 Sverdrup Steel opened sales offices in Denmark, shortly followed by the opening of the company's first sales offices in Sweden in January 2015. With these two additions,

the company is confident that they will be able to strengthen their market share in these two markets even more.

Customer Base

Sverdrup Steel has close working Relationships with customers from all parts of the world from Korea and India, through the Middle East, to North and South America. Most of the material Sverdrup Steel sells, finds its end use in the oil and gas industry, but the following industries are also catered to: electrical power generation, environmental protection, and marine engineering. The company aims to be the preferred partner for customers of all sizes, and takes pride in having the service and flexibility to accommodate the entire range of end users.
