

Tubacex

Founded in 1963, Tubacex brings the experience of a world leader combined with a strong research and development effort which is needed to fulfill the future needs of the industry. One of the main seamless stainless steel producers worldwide, the recent acquisitions of the Italian company IBF and the seamless division of Prakash in India allow Tubacex to increase the manufacturing range in tubes and pipe, further products and premium solutions, a wider market presence in different areas and industries, and synergies at operations and R&D levels. With IBF, Tubacex offers the most complete dimensional range in seamless stainless tubes, with an outside diameter up to 42"; and significantly increases its position in the fittings and special components market. Through its new Indian mill, Tubacex increases its presence in Asia, with new equipment and possibilities empowered by future investments. With these acquisitions Tubacex advances in the development of its strategic plan which enters in a phase of growth.

The Tubacex group, with sales over 700 million euro, has a vertically integrated production presence (Steel, Seamless and mechanically bored pipes and tubes, and fittings and special connections) with manufacturing mills in Spain, Austria, Italy, the U.S., India

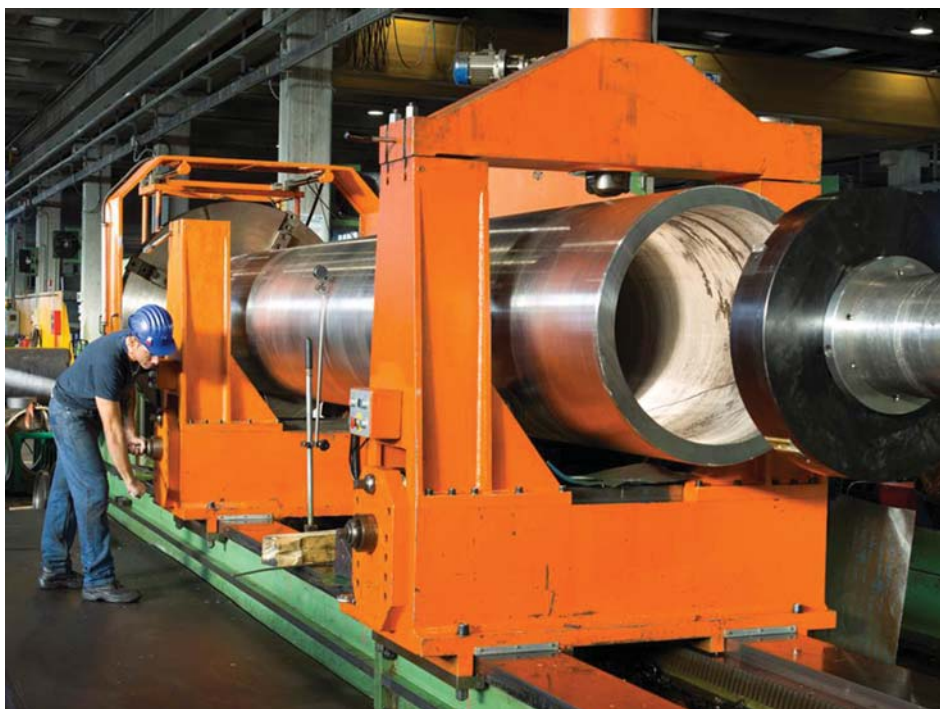

and China and a worldwide commercial presence with sales representation in 30 countries and several service centers all over the world – Tubacex Service Solutions. Manufacturing range in tubular products goes from 3 mm O.D. to 72" with a wide range of steel grades, according to main manufacturing standards or special requests from our customers. Our metallurgical engineers are devoted to the development of sophisticated steels capable of operating in the demanding environments of the future.

Our customers are leading companies in the Oil & gas, refining, petrochemical, fertilizer, power generation and metal-mechanic industries, with high quality standards and innovation and the need for increasingly sophisticated tubular solutions for the most challenging environments, in applications and

products as Oil Country Tubular Goods (OCTG), tubes for subsea application (umbilical, risers, manifolds, flowlines), tubes for furnaces, heaters and re-heaters for the petrochemical industry, tubes for boiler equipment for the power generation industry and Heat exchanger, reactor and condenser tubes for the petrochemical and fertilizer industries. Quality and service to our customers are the main drivers of our activity, with a wide list of approvals by end users and international organizations of both products and management systems. Tubacex Group is highly committed to the environment and all production units are ISO 14001 certified. Additionally occupational health and safety is also a key element of our culture. The group's manufacturing sites are OSHAS 18001 certified.
